GETTING A FLU SHOT MORE CONVENIENT THAN EVER BEFORE

Patient First's *Fast Track Anytime* Flu Shot Program Takes the Time and Sting Out of Inconvenience

Patient First Flu Shot Anytime Program is Perfect for Extreme Commuters, Busy Executives and Employees, Weekend Warriors and Anyone Who's Been Too Busy to Stay Healthy

WHAT: *Patient First* is a Baltimore area primary and urgent care provider with physicians available from 8 a.m. to 10 p.m. 365 days a year.

Flu season is almost here and getting a flu shot is more convenient than ever before. A long commute? Too much work? Weekends too busy to spend time getting a flu shot? Not any more! Patient First's *Fast Track Anytime* Flu Shot Program takes the time sting out of getting a flu shot.

In response to consumer demand and to make staying healthy easier for patients, Patient First has adjusted its flu shot hours this year to make getting a flu shot at its medical centers more convenient than ever.

Studies show that getting a flu shot can reduce the numbers of days employees miss work, saving businesses time and money, and give families what they need – more healthy time together.

Find out from a leading primary and immediate care medical provider in Maryland about the flu and the Patient First Flu Shot *Fast Track Anytime* program.

WHEN: **Interviews with physicians may be arranged upon request.**
